Subject: Re: Crystal Ice - Evaluation of Exhaust & RV Discharge Location
Date: Wednesday, August 01, 2012 8:47:38 AM

Mr. Wallace,

Just a quick follow-up regarding our e-mail dated 7/5/12 (see below). Please pass along any thoughts you may have as we are planning to meet on August 14 for a focussed PHA review and further evaluation of the vent location options.

Thank you.

Neil

Mr. Wallace,

As a follow-up to our telephone meeting on May 15, attached for your consideration is an evaluation of the exhaust & relief vent (RV) discharge location for the five areas of concern you identified during your site visit. The attached table includes an evaluation of the existing discharge locations vs. applicable industry code. The evaluation also includes proposed corrective actions where warranted. Please note that the proposed corrective actions are preliminary, pending a team review during a process hazard analysis scheduled for August 14, 2012 at Crystal Ice's facility.

Thank you for working with us to resolve these issues and please let us know if you need anything else at this time.
